

## **PUBLIC WORKS REPORT**

1. Caldwell Asphalt has been contacted to do the street repairs on maple between 3<sup>rd</sup> and 4<sup>th</sup> street. Monson's bid came in at \$5500.00 compared to \$3800.00 from Caldwell.
2. Glieden has been in town working on the street repairs.
3. I had a sign made up at Creative Details for the brush pile at the brush site explaining what can and can't be put on the pile.
4. As of now we are still without our Water Tower alarm. We are still waiting for the repairs to be done. I'm keeping both pumps on so if one goes out the other will kick in.
5. I would like to have Lauritsen Septic come and jet a few sewer lines so we can get the camera down them. Some are in the field and might have to wait till fall to get too though.
6. Haven't gotten as many Sewer lines inspected as I would have liked due to weather and dirty lines. The ones we did inspect all looked good again just need rehab in the manhole itself.
7. We are planning on getting tables from the County and barricades from City of Olivia for FUN DAYS. We ordered five dumpsters, with two downtown for dance and two for volleyball and one in shelter area for watermelon feed.

8. Hurley Tree Care was here to do the trees at the school. It really cleaned it up. The Boxelder we had taken down was rotten and hollow inside.
9. I would also like to purchase a used paddleboat or inflatable boat for at the ponds. Need something to get out on the water to spray or dredge weeds and unplug drain pipe when plugged with weeds. We used to have an inflatable but it had too many holes in it to fix. Thought a used small paddleboat that can be chained up out there during the summer and brought in in the fall would work nice. A little more sturdy than an inflatable. A used paddleboat would cost around \$300.00 and an inflatable about the same.
